

Regarding Airspace Docket No. 03-AWP-19 and Comments to FAA Docket No. FAA-2003-16722 :

In addition to the well voiced technical objections on approach and airway safety noted by others, please examine the most important issue. The proposed rule change lacks common sense. It is equivalent to closing Interstate 5 to the public because the military wants to use it for driving practice. There is no alternate corridor here. Certainly, we can all share.
